Rentokil

The Experts in Pest Control

Lumnia Slim

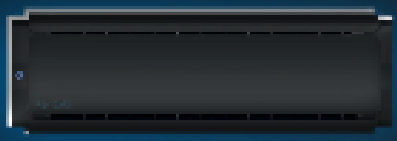

One of the most stylish and discreet insect light traps for use in front-of-house locations

Lumnia Slim is the latest addition to Rentokil's Lumnia range. It's a highly effective, elegant and discreet solution that has been specially designed for customer-facing locations such as cafes, bars, restaurants and reception areas.

The unit's modern exterior holds a powerful 10W LED lamp that draws in flying insects while using a very low amount of energy. This makes the Lumnia Slim cost-effective and environmentally friendly.

This insect light trap also has an effective glueboard inside and is safe and easy to service. By discreetly covering the insects, the design prevents unhygienic insect fragments being blown out of the unit.

Lumnia Slim can be mounted on a wall or installed on a flat surface and, because it's so slender and unobtrusive, you won't know it's there at all.

SAPCA members. The South African Pest Control Association (SAPCA) is registered with the Department of Agriculture and is aliated with the National Pest Management Association (NPMA), which is instrumental in the certification of programmes. By choosing a SAPCA member, you can be assured that the services you receive are from a trained and trusted company that meets strict membership criteria.

It's highly effective

It eliminates the nuisance caused by flying insects, attracting them from a much greater distance.

It's cost-effective and environmentally friendly

The long-life LED bulbs use less energy, thereby lowering your running costs and reducing your carbon footprint.

It's aesthetically pleasing

It's an ingenious, stylish design that comes in a range of colours, so it's now easier to complement your brand and interior colour schemes.

It's designed for convenience

It's a small, discreet, versatile unit that packs a powerful punch, so it can be used in tight spaces, on walls or flat surfaces, and in public areas.

It's safe and hygienic

No pesticides are used, insect fragments are avoided and it's quick and easy to service.

It provides peace of mind

It complies with legal and health and safety requirements and is HACCP approved

It provides room coverage

- Greater area coverage ($72m^2$ up to over $250m^2$)
- South Africa bans mercury-added products
