Rentokil

The Experts in Pest Control

Lumnia Suspended

The innovative, ceiling-suspended solution – ideal for covering large, open areas in high-dependency locations.

Lumnia Suspended is the latest addition to Rentokil's Lumnia range.

It's a highly effective fly-control solution that has been developed for back-of-house, high-dependency locations such as food processing, pharmaceutical, industrial or warehousing facilities. It's also one of the lowest energy consumption units of this calibre on the market.

Lumnia Suspended has been expertly designed for an efficient, proven catch-rate to mitigate the risk of infestation. It's a flexible solution, providing your facility with different options – a flat glueboard or an encapsulation module.

The encapsulation module traps the flies onto an adhesive film that automatically winds onto a clean glue surface. This hygienically contains caught flies and prevents any insect fragments being blown into the environment, thereby reducing the risk of cross-contamination.

The unit's modern exterior contains three powerful 10W LEDs that are highly attractive to flying insects, but it uses a very low amount of energy when compared to other insect light traps.

It's highly effective

It eliminates the nuisance caused by flying insects, attracting them from a much greater distance.

It's cost-effective and environmentally friendly

LED lamps use less energy, thereby lowering your running costs it saves up to 50% energy costs and reduces your carbon footprint.

It has a large attraction area

It's an open, ceiling-suspended solution that allows multi-directional, UV-LED attraction.

It's adaptable

It's available with a flat glueboard or an encapsulation module, depending on requirements.

It's safe and hygienic

No pesticides are used, insect fragments are avoided and it's quick and easy to service.

It provides peace of mind

It complies with legal and health and safety requirements.

Coverage area

($72m^2$ up to over $250m^2$)
